

FUNCTION MAXIMUM NUMBER

Code:

```
2    package com.mycompany.functionmaxnumber;
3
4
5    public class FunctionMaxNumber {
6        public static int max(int num1, int num2){
7            int result;
8            if(num1>num2){
9                result=num1;
10           }else{
11               result=num2;
12           }
13           return result;
14       }
15
16       public static void main(String[] args) {
17           int i=5, j=2;
18           int k= max(i, j);
19           System.out.println("The maximum number between"+i+"and"+j+"is"+k);
20       }
21   }
```

Output:

```
The maximum number between5and2is5
```
